

OUR ALL NEW

Royal Platinum

Our History

Weather King Windows & Doors is a family owned business which was started in Detroit in 1950. We began building vinyl windows in 1982. In 1994 we expanded our operation by purchasing a 90,000 sq. ft. building in Farmington, MI and moved our office and manufacturing to this current location.

Our experienced and highly skilled workforce has been with us for an average of 15 years, with a number of them having over 40 years with our company. They carry with them a wealth of experience in the window industry and a dedication to provide you with a superior quality product.

We are proud to introduce our 3 window lines that have new advanced features which will enable you to choose the window to fit your needs. Our comprehensive network of locally operated dealers will guide you to create the home of your dreams.

Our All New Royal Platinum

The Weather King Royal Platinum windows carry forward the tradition that satisfied homeowners have enjoyed for over 30 years. The new design is similar to our higher triple glazed Premier line and our midgrade Royal Plus II line using new welded frames and sash that are extruded with multiple chambers to create a thermal plane for enhanced energy efficiency.

The new designs incorporate SunShield® high-performance vinyl technology. SunShield® is uniquely formulated and laboratory-proven to perform better than alternative building materials. SunShield® ensures long-lasting color retention and low maintenance, plus the added confidence of a lifetime warranty against rotting, cracking, pitting, corroding and peeling. These and other features truly put this window several steps ahead for customers looking for a better choice.

Comfort Level

The Royal Platinum features the same SunShield® vinyl as our Royal Plus II but adds improved weatherstripping and double strength glass as well as our pocket sill for increased energy performance and sound suppression. It features self actuating locks for safety and convenience and is available in all options and laminates.

The Weather King Advantage

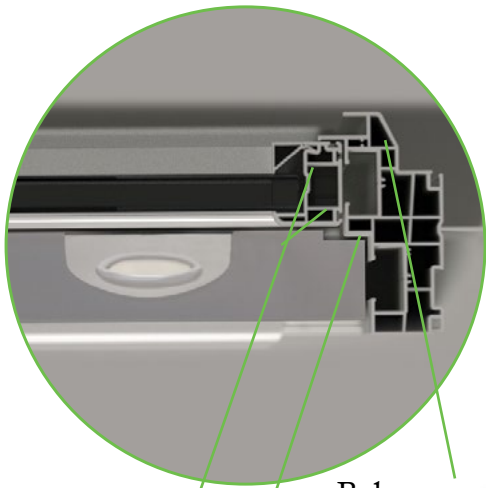

ADAPTABLE ♣ DEPENDABLE ♣ SUSTAINABLE

OUR ALL NEW Royal Platinum

The Royal Platinum window is available in Euro White, Almond or any of our laminate colors, in either replacement or new construction. The line offers double and single hungs, double and single slides, three lite sliders and picture windows. You can also choose from casements, awnings, and bay & bow windows. The windows come with double strength glass which helps block out unwanted noise. Comfort Advantage Glass is optimized for the northern regions. Our CA25D Low E Argon or CA20D Double Low E Argon exceeds today's Energy Star and state building codes. Better by choice, Weather King Platinum.

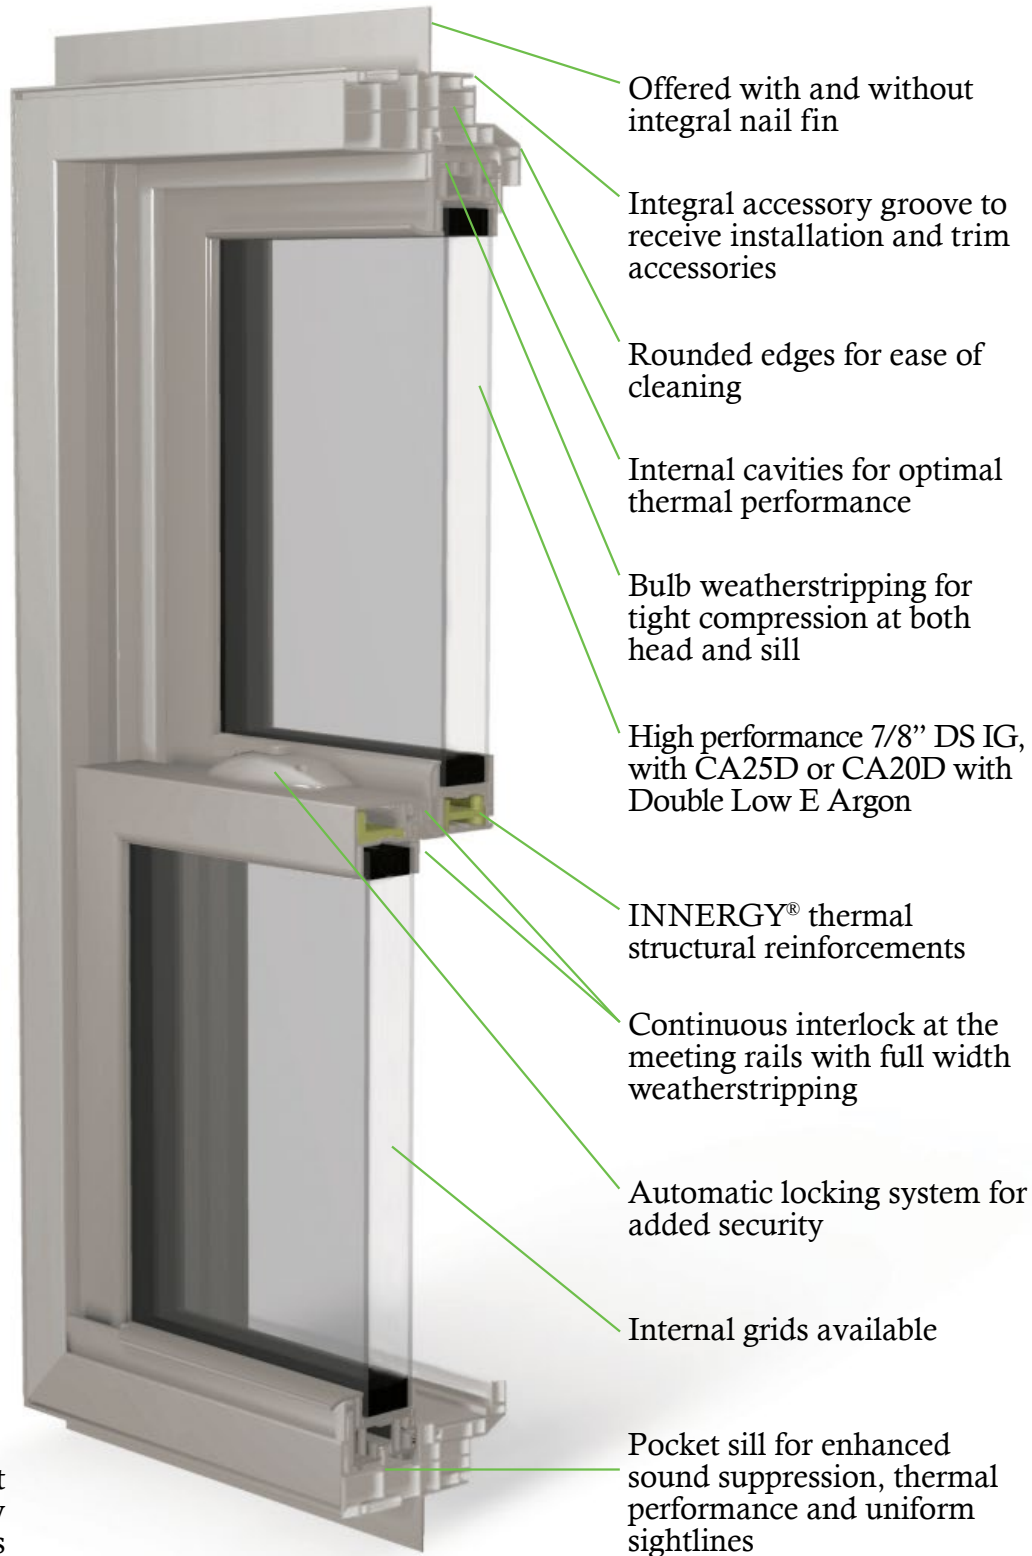

Contemporary self actuating locks for safety and convenience. The hung windows use Aluma-tilt balances that are adjustable for easy operation in any size window. Sliders feature nylon rollers for smooth operation. The windows are custom made to order for that perfect fit.

Triple Weatherstripping

Balance pocket surrounded by hollows

Continuous thermal plane
